

BL5299 – Internship in Conservation and Nature-based Climate Solutions (12MCs)

This is a project-based module for students taking the M.Sc. in Biodiversity Conservation and Nature-based Climate Solutions. Students will take this module or BL5199 (Research project in Conservation and Climate Solutions). In this module, students will engage in an internship project with our industry partners. Through this independent project, students will gain hands-on practical knowledge in solving conservation-science related problems using scientific techniques. The internship project is concluded with a written report and an oral presentation.
